**COURSE DESCRIPTION** : SolidWorks Simulation - Fatigue FEA

**COURSE DURATION** : 10 hrs.

## SYLLABUS

### **Module 1: Introduction to Fatigue**

- Fatigue
- Stress-life (S-N) Based Fatigue
- Fatigue Terminology
- Constant Amplitude
- Damage Factor Plot
- Fatigue Study with Dead Load

### **Module 2: Advanced Fatigue Analysis**

- Objectives
- Fatigue Study
- Variable Amplitude
- Rain flow cycle counting Method.
- Fatigue Strength Reduction Factor

**Certificate:**

*Transferring Technology...*

On successful completion of the course and evaluation, the Certificate will be issued by aCADemix.

## OTHER COURSES

### **SolidWorks 3D CAD**

- SolidWorks-Basics
- SolidWorks-Advanced
- SolidWorks- Mold Design
- SolidWorks- Routing
- SolidWorks-Composer
- SolidWorks-MBD

### **SolidWorks Simulation**

- SW Simulation-Advanced
- SW Simulation-Drop Test FEA
- SW Simulation-Dynamic FEA
- SolidWorks Motion
- SolidWorks Plastics

### **SolidWorks Flow Simulation**

- SolidWorks Flow Simulation

### **Design For Quality (DFQ)**

- GD&T-Introduction
- GD&T-Advanced
- Tolerance Stack-Up Analysis
- DFMEA

*Transferring Technology...*

### **SolidWorks Automation**

- SolidWorks API - Basics
- SolidWorks API - Advanced

### **SolidWorks PDM**

- SolidWorks PDM- User
- SolidWorks PDM - Admin

### **SolidWorks PDM Automation**

- SolidWorks PDM- Automation

### **Abaqus CAE**

- Abaqus CAE - Linear Static Analysis
